## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript
**Frontend:** Next.js, React.js, Tailwind CSS, Zustand, Recoil, TanStack Query, Framer Motion, Material UI
**Backend:** Node.js, Express.js, REST APIs, GraphQL, JWT, Zod
**Database:** MongoDB, Mongoose, PostgreSQL, Prisma
**Tools & Platforms:** Linux, Docker, Git, GitHub/GitLab, Postman, Apolo, Vercel, Railway

## EXPERIENCE

**Experiment Labs** — May 2025 – Present
*Full Stack Developer* — *(Remote) Delhi, India*

- Built the end-to-end frontend of an AI Interviewer platform using React.js, TanStack Query, and Zustand, optimizing state management and data fetching to improve performance and reduce load times by 30%.
- Built report generation functionality with custom templates and well-designed & accurate PDF exports.
- Developed an Academic Portal handling large detailed datasets for consultants with optimized performance.
- Contributed to the company's CRM by building new frontend modules and fixing critical UI and functionality issues.
- Resolved numerous bugs across multiple platforms, improving user experience and product stability.

**Plan Me** — June 2025 – Sept 2025
*Frontend Developer Intern* — *(Remote) San Francisco, CA*

- Built the end-to-end Budgets and Payments frontend module using Next.js, Zustand, GraphQL, and MUI, delivering a key feature from scratch to production.
- Added advanced functionality such as exporting data in PDF and other formats, debounced updates, optimistic UI updates, and robust error handling.
- Improved Invitations module by fixing broken UI, making it responsive, handling image upload edge cases, and ensuring smooth preview functionality.
- Enhanced the Guests module, enabling users to export guest lists with proper fallbacks and in-app notifications.
- Worked on multiple UI/UX bugs and enhancements across modules.

## PROJECTS

**Truth Chain** *Next.js, Tailwind CSS, Framer Motion, Lenis Scroll* — Live

- Built the frontend of a decentralized fact-recording platform during a Web3 hackathon, integrating with Solana smart contracts to display verified facts.
- Designed a futuristic dark-themed UI with smooth animations and scroll effects using Framer Motion and Lenis.

**KeepIt** *TypeScript, React.js, Recoil, Framer Motion, Tailwind CSS, Node.js, Express.js, MongoDB* — GitHub Live

- Developed a full-stack tool to save and organize links, notes, and other content all at one place. Secured with JWT authentication and Zod validation.
- Implemented real-time state management with Recoil and Animations with Framer Motion
- Designed a clean and minimal fully responsive UI with custom elements and self made icons & components.

**TeachHub** *JavaScript, React.js, Tailwind CSS, Node.js, Express.js, MongoDB* — GitHub

- Built a course marketplace with role based auth and optimized REST APIs, cutting response time by 40%.
- Designed a scalable MongoDB schema to handle thousands of records with fast queries and consistent data validation.

**Portfolio Website** *HTML, CSS, JavaScript* — GitHub Live

- Built with raw CSS, a personal portfolio, optimized layouts, and smooth animations to showcase projects and skills.

## EDUCATION

**BCAS, Delhi University** — Dwarka, Delhi
*BSc Hons. Computer Science* — *2021–2024*

**Vijaya Sr. Sec. School** — Bahadurgarh, Hr
*12th* — *2020–2021*
